

QATAR FUEL ADDITIVES COMPANY LIMITED

ENERGY MANAGEMENT POLICY

As a sustainable leading producer for Methanol and Methyl Tertiary Butyl Ether (MTBE), Qatar Fuel Additives Company Limited (QAFAC) is committed to the efficient, effective, and economical management of its energy use and consumption.

QAFAC Energy Management Policy upholds the organization's strategy toward business excellence through energy efficiency improvement and promotes principles of business operations by developing our talent, fostering our culture of excellence, and maintaining the highest HSE standard.

This policy covers all QAFAC business operations comprising MTBE and Methanol production plants, utilities plant, and product storage and shipment.

QAFAC is committed to:

1. Fulfillment of applicable legal requirements and other requirements related to energy efficiency, use, and consumption.
2. Enhancement of energy efficiency by using energy efficient products and services during design, procurement, and maintenance activities, wherever economically and technically feasible and environmentally viable, whilst maintaining a safe business operation.
3. Setting and reviewing of energy management objectives and targets for all relevant energy aspects.
4. Providing essential information, necessary resources, and support for achieving its energy management objectives and targets.
5. Continual improvement of the Energy Management System to ensure suitability, effectiveness, and efficiency.
6. Reviewing and continually improving energy performance by measuring, monitoring, quantifying, analyzing, and improving energy use and consumption, in comparison to the baseline.
7. Fostering and spreading a culture of energy management and efficiency through effective participation of all stakeholders.
8. Promoting innovation and creativity for continual improvement in energy efficiency and conservation, through proactive dialogue, cooperation, training, awareness programs, research collaborations, and institutional partnerships.
9. Benchmarking and adopting best practices in the field of energy management.
10. Reviewing and updating the policy on yearly basis or as and when deemed necessary and rendering this policy to all employees, stakeholders and people working with the organization, where appropriate.
